

FOR IMMEDIATE RELEASE

### **Sullair Offers New Series of Literature for AirMetrix<sup>SM</sup> Solutions**

(Michigan City, IN, October 17, 2005) – Sullair Corporation has released a new series of literature that details all AirMetrix<sup>SM</sup> solutions. The literature is designed to help plant managers identify ways to reduce the costs and improve the efficiency of their compressed air systems.

The seven-piece, full-color literature series begins with a six-page overview of the AirMetrix<sup>SM</sup> program and how a “systems approach” to compressed air systems offers opportunities to reduce waste, downtime, and lost productivity. The individual solutions, like AirTility<sup>TM</sup>, have their own dedicated piece of literature that allows plant managers to learn how each AirMetrix<sup>SM</sup> solution offers cost and energy savings in different ways.

The AirMetrix<sup>SM</sup> series is available as a complete Information Kit, or as single pieces based on individual facility needs. For further information about Sullair’s complete line of industrial compressed air system products or AirMetrix<sup>SM</sup> program, visit [www.sullair.com](http://www.sullair.com), or contact the company at (800) SULLAIR.

#### **ABOUT SULLAIR CORPORATION**

Sullair is one of the world’s leading compressor manufacturers, and is the only air compressor manufacturer to concentrate exclusively on rotary screw technology. Sullair is a company of Hamilton Sundstrand, which is a division of the United Technologies Corporation. Sullair has been an industry leader and innovator since 1965. With subsidiaries in France, China, and Australia, Sullair is also a globally recognized manufacturer of compressed air contaminant removal equipment, vacuum systems, and contractors’ air tools.
