

FOR IMMEDIATE RELEASE

Sullair Extends Its Line of *S-energy*[™] Series Compressors that Meet Intensifying Demand for Maximum Energy Efficiency

Michigan City, IN October 1, 2007 — Sullair Corporation, a business unit of Hamilton Sundstrand, a United Technologies Company, is extending its line of breakthrough high efficiency *S-energy*[™] Series Lubricated Rotary Screw Air Compressors.

Sullair's *S-energy*[™] line is now available in models ranging from 15 to 100 horsepower, 11 to 75 kW, capacities from 36 to 493 acfm, pressures ranging from 100 to 175 psig, and with Constant Speed or Variable Speed Drive.

Energy costs represent 82% of the total operating expense of a compressed air system*. As these energy costs continue to rise, intensifying the demand for ultra energy-efficient compressors, Sullair Corporation is responding. By combining several new and established features, Sullair's *S-energy*[™] series compressors have proved to be substantially more efficient than compressors of similar design. The *S-energy*[™] Series features Sullair's time-proven air-end design for superior CFM performance. In addition, *S-energy*[™] compressors feature a new low-pressure drop air/fluid separation system to prevent energy loss. In total, these *S-energy*[™] compressors offer exceptionally low life cycle cost.

Sullair Emphasizes Energy Efficiency

Sullair Corporation has made significant contributions to maximizing energy efficiency and productivity of compressed air systems. Among these contributions is AirMetrixSM, a total system management program designed to help users reduce energy consumption and maximize productivity by analyzing, managing and controlling the total compressed air system.

Recently, Sullair became an ENERGY STAR Partner. ENERGY STAR is a collaborative program of the U. S. Environmental Protection Agency (EPA) and the U. S. Department of Energy (DOE). The ENERGY STAR certifies and labels products that are energy efficient.

For more information, the new Sullair *S-energy*[™] brochure is available on-line at www.sullair.com.

About Sullair Corporation

Sullair is one of the world's leading compressor manufacturers, and is the only air compressor manufacturer to concentrate exclusively on rotary screw technology. Sullair has been an industry leader and innovator since 1965. With subsidiaries in France, China and Australia, Sullair is also a globally recognized manufacturer of compressed air contaminant removal equipment, vacuum systems, portable compressors, and contractors' air tools. www.sullair.com
