// PARTNER CARE

FIXED PRICE SERVICING

Sign up for Partner Care and receive economical, fixed price, scheduled servicing on time, when due.

Sullair Partner Care provides economical fixed price servicing for all compressors. Regularly maintaining your air compressor system and ensuring that it is running at its optimum efficiency is key to your business success. Sullair's Partner Care program guarantees that your compressor is kept running efficiently saving you thousands every year.

THE COST OF IRREGULAR AIR COMPRESSOR MAINTENANCE ?

Thinking about your facility – how important is your air compressor? At most companies, the cost of lost production and downtime in just a few days will often exceed the total purchase price of the compressor. Sullair Partner Care ensures that your compressor maintenance needs are met on time, every time.

WHY INVEST IN MAINTENANCE?

During its lifetime the energy consumption of an air compressor will exceed its purchase and service costs by many times over. A typical 11kW rotary screw compressor will cost more in electricity charges per annum on a single-shift operation than its initial purchase price. A simple (yet preventable) air leak could double the running cost of this machine.

FACTORY TRAINED TECHNICIANS

Sullair technicians are factory trained with the latest tools and diagnostic techniques to ensure the optimum service of your compressor. Our training combines our local experience with our global reach – drawing on local and overseas engineering and design resources to diagnose and solve any issue. We can help because we know air.

ALWAYS AIR. ALWAYS THERE.

Sullair factory trained technicians are on stand-by for emergency breakdown response 24 hours a day, 7 days a week, all year round. No matter what you need — service, parts or advice — one phone call is all it takes. Call us on 1300COMPRESSOR (1300 266 773) and our friendly local staff will assist you.
